### Precautionary Statements Keep Out of Reach of Children

#### CAUTION

#### Environmental Hazards

Small birds may become fatally entrapped by this tacky repellent. To reduce hazards to legally protected species, and to avoid noncompliance with the Federal Migratory Bird Treaty Act, follow all instructions in the Directions For Use. Keep out of lakes, ponds and streams. Do not contaminate water sources by cleaning equipment or disposing of waste.

### STORAGE AND DISPOSAL:

Storage: Store at room temperature prior to use. Keep in original container in dry place, away from children and pets. Disposal: Do not reuse empty container. Securely wrap container and discard in trash. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label. Read the entire label before beginning and follow all use directions and precautions.

**USE RESTRICTIONS:** This product may be used to repel pigeons, starlings and house (English) sparrows from buildings and adjacent structures. This product may be applied to window sills, roof lines, gutter edges, signs, ornamental copings, cornices, ledges, and similar surfaces.

Wear disposable gloves when using this product. Do not apply this product in rainy or damp weather or in temperatures below freezing. Product should be approximately at room temperature (65 - 80°F) (18 - 27°C) at the time of application.

### PREPARING SURFACES FOR TREATMENT:

1. To reduce potential exposure to bird-related diseases, wear waterproof gloves and a respirator approved by the U.S. Bureau of Mines for dust protection when cleaning areas to be treated. Prepare surfaces to be treated by removing dirt, droppings and other debris.

Using water mixed with a wetting agent or detergent, wet surfaces where droppings are present to limit generation of airborne dust during cleaning. Allow cleaned surfaces to dry fully prior to treatment as product adhesion may be poor on wet surfaces.

2. Check the condition of the surface to which the repellent is to be applied. Treat porous surfaces such as wood, stone, or concrete with an undercoating such as paint or sealer before applying 4 the Birds® BIRD REPELLENT. On asphalt or wood shingles, or on any other surface from which relatively easy removal of product is desired, apply waterproof tape or similar material first and apply the repellent to the tape rather than its substrate.

### APPLICATION DIRECTIONS:

1. Place cartridge in standard caulking gun.
2. Angle-cut the tip of the cartridge to desired bead width: 1/4" (6mm) for starlings and pigeons; 1/8" (3mm) for house sparrows. DO NOT APPLY BEADS WIDER THAN THOSE INDICATED.
3. Beginning 1" (2.5 cm) from outside edge, apply product in a line traveling the length of the surface to be treated. Leave 1" gaps in bead every 10" (25 cm) to allow for drainage. One such bead should be sufficient on surfaces up to 4" (10 cm) wide. For surfaces 4" - 8" (10-20 cm) wide, apply two parallel beads spaced 2" (5 cm) apart, with the outermost bead being 1" from the outer edge. On surfaces wider than 8" (20 cm) apply a series of parallel beads 2" - 3" (5-7 cm) apart or apply two parallel beads 1" from the outer edges and a repeating "S-shaped" line throughout the area between the outer beads.
4. One ounce of product will cover one linear foot at the bead width indicated for starlings and pigeons. Less product will be needed per linear foot at the bead width indicated for house sparrows.
5. The effectiveness of this product will diminish if it becomes largely covered with dirt and debris. In such cases, clean the surfaces and repeat treatment.

### CLEAN-UP:

Remove product from person and application equipment by using vegetable oil first, followed by soap and water. Clean treated surfaces by removing tape (if used) and by scraping off material and applying mineral spirits.

Wear appropriate skin and respiratory protection when performing these tasks.
